

# SANIQUAT

**SANIQUAT is a liquid disinfectant based on quaternary ammonium compound (QAC) with a special wetting agent to provide detergency.**

It is active against many harmful microorganisms and is stable in the presence of organic matter and temperature changes. Use this for sanitizing and cleaning of equipment and utensils in food processing, dairy industry, bars, restaurants, institutional kitchens, meat and poultry processing plants and farms.

A proven “one-step” disinfectant in the presence of organic soil for institutional and industrial use.

- Disinfectant
- Sanitizer
- Fungicide
- Virucide

## General use instruction:

Apply to walls, floors and other hard (inanimate) non-porous surfaces such as tables, chairs, countertops, sink, tile, porcelain and bed frames with a cloth, mop or mechanical spray device so as to thoroughly wet surfaces. For heavily soiled areas, a preliminary cleaning is required. Prepare a fresh solution daily or when use-solution becomes visibly dirty.

### FOR GENERAL DISINFECTION

Dilution : 2 ml per liter of water (200ppm)

### FOOD SERVICE SANITATION RECOMMENDATIONS:

Equipment and utensils shall be thoroughly pre-flushed or pre-scraped or pre-soaked to remove gross food particles and soils.

1. Thoroughly wash equipment and utensils with appropriate detergent solution preferably heated to optimize cleaning. We recommend *APC or LINOL All purpose Detergent*.
2. Rinse thoroughly with clean water.
3. Sanitize by immersion in a solution of SANIQUAT (2.5ml per liter)
4. For equipments and utensils too large to sanitize by immersion, apply solution of *SANIQUAT* by rinsing, spraying or misting, or swabbing until thoroughly wetted.
5. Air dry or wipe with clean towel.

**FOOTBATH:** 4 ml per liter of water (400 ppm)
